

Institut für Textiltechnik der RWTH Aachen

3T TextilTechnologieTransfer GmbH

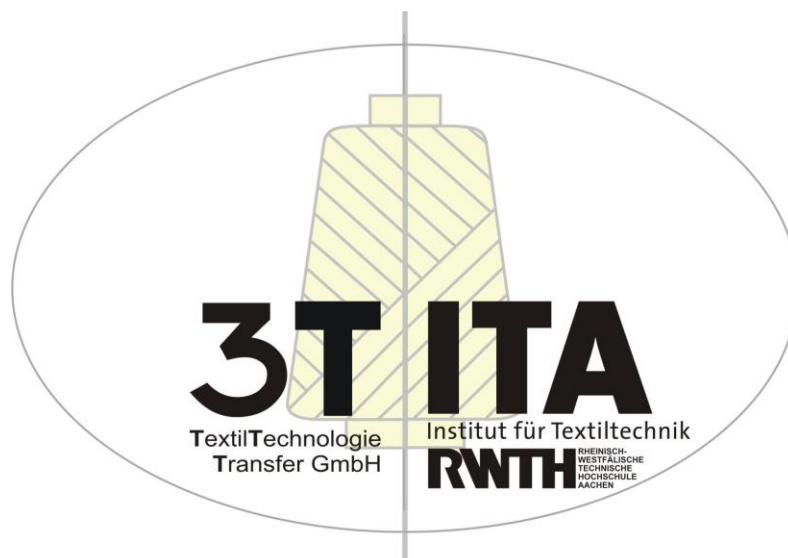

ITA and 3T GmbH cooperate in research and development both for textile machinery production and the textile industry as well as for technology transfer in other branches of the industry.

ITA creates new knowledge along the entire textile chain and provides the basis for further development of your technologies and production. ITA is your contact for applied and adjusted-to-your-needs research.

3T GmbH uses research results from textile mechanical engineering and textile industry and transfers them into your company. This ensures that you receive industry and market-oriented solutions quickly and directly.

Due to the cooperation of 3T GmbH and ITA, the extensive textile-technological know-how of both partners is at your command for solving your problems.

## Research and Courses

- Basic Research Along the Entire Textile Chain
- Process Simulation and Process Optimisation
- Machine Optimisation and Automation
- Product Development
- Development of Measurement Techniques and Testing Instruments
- Education

## Development and Transfer

- Further Development of Research Prototypes
- Pilot and Limited-lot Production
- Measuring and Testing Services
- Commercial Exploitation of Patents
- Consulting:  
Process Analysis  
Commercial Analysis  
Feasibility Studies
- Advanced Training

## The Advantages for Your Business

- Closing the Gap Between Research and Industrial Application
- Fast Access to Newly Acquired Knowledge and Research Results
- Fast and Direct Transfer of Research Results into Industry
- New Possibilities of Cooperation
- Easy Contracting
- More Effective Administrative Management
- Better Support and Warranty

“3T GmbH represents an excellent possibility to put our research results quickly and directly into practice. We are pleased to cooperate with 3T GmbH.”

“We, the 3T GmbH, offer you with our knowledge comprehensive problem solving along the entire textile chain. With ITA a competent research partner stands at our side.”
